

Sharp panel access to the Webiplex cloud delivers...

- ◆ Document Capture
- ◆ Document Management
- ◆ Business Process Automation
- ◆ Data Capture and Integration
- ◆ Document Control
- ◆ Secure Access from the Sharp Panel

DocuPeak and Sharp's OSA technology...

- ◆ Leverage Sharp 's innovative OSA 4 architecture
- ◆ MFP screens look and function identically to DocuPeak web
- ◆ Ad-Hoc selection of folder and indexing meta data
- ◆ Customized one button click business processes
- ◆ Connect to Webiplex's cloud (SaaS) or an on-premise "private cloud"

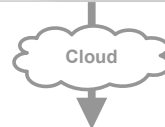

The DocuPeak Sharp OSA Connector is an OSA 4 based connector that brings the power of DocuPeak business processes to the MFP panel. With the connector, any compatible MFP can act as the starting point of a business process by allowing scanned documents to be fully indexed on the MFP panel itself. In addition, administrators can setup custom, one-button-click business processes to pre-fill out common indexing parameters.

“
Move beyond just scan-to-store; deliver scan-to-process with DocuPeak and OSA.
 ”

**Sharp OSA-Enabled DocuPeak BPM:
 Scan to the Cloud, Manage from the Cloud**

The DocuPeak Sharp OSA Connector allows for the scanning and indexing of documents directly at the Sharp OSA MFP panel, and sent in real-time to a DocuPeak application portal. Both ad-hoc folder browsing as well as predefined workflows (i.e. business processes) can be created as options on the MFP panel.

The image shows two screenshots of the DocuPeak web interface. The top screenshot is the 'DocuPeak Login' page, featuring a 'User Name' field with 'jane_doe', a 'Password' field with masked characters, and an 'OK' button. Below the login form, it says 'Version : 6.0.0'. The bottom screenshot is the 'Document Indexing' form. It has a 'Folder:' dropdown set to '.....Scanned Input', a 'Form:' dropdown set to 'AP Invoice', an 'Invoice No.' field with '123450007', a 'Vendor Name' dropdown set to 'General Contracting', and an 'Invoice Total' field with '\$ 45.55'. A 'Save' button is at the bottom of the form.

Invoice No.	Invoice Date	Invoice Total	Vendor Name	Vendor Code	P.O. Number
123450007		\$45.55	General Contracting		
5757H101		\$4.77	Smiths Micro		
456789		\$4,566.56	Johns Landscaping		
1234567		\$45.22	Johnson's Trucking

Vertical Applications

DocuPeak applications have been created in numerous vertical applications.

- **Accounting:** AR/AP, Invoice Automation
- **Shipping/Supply-Chain:** Manifests, PODs
- **Government:** Citation management, customer payments
- **Mortgage/Lending:** Supporting documents, decisioning
- **Human Resources:** Employee records, resume receiving
- **Legal:** Court records, case files, discovery
- **Insurance:** Claims management, workflow
- **Education:** Student records, applications

Webiplex Professional Services

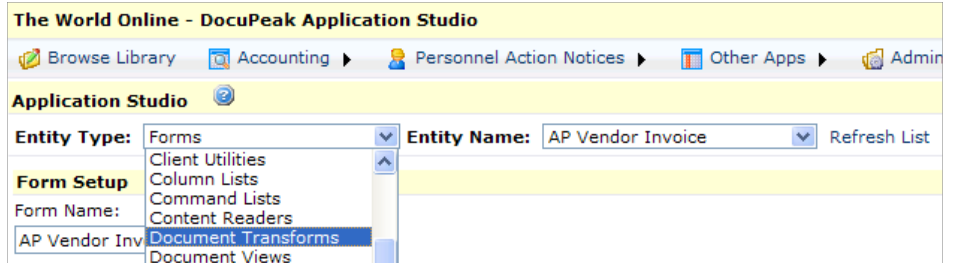

Webiplex uses, and recommends, a phased, iterative implementation model:

- **Entity Analysis:** Business data and document relationships and requirements analysis.
- **Process Analysis:** A review of the constituents (i.e. users) and their relationships.
- **Integration Analysis:** Which existing or other systems must be integrated.
- **Iteration:** Frequent reviews with client during design and implementation.

Simple to Setup, Limitless Flexibility

Every customer has different requirements and instead of a "one-size-fits all" approach used by other document management vendors, Webiplex DocuPeak provides a platform for rapidly developing customized applications that are always on target. The DocuPeak Application Studio lets our customer and partners point-and-click through the setup of a business process using simple forms and wizards. In addition, DocuPeak applications are re-usable via our application package technology so it's easy and convenient to build an internal library of common business processes.

An Active Sharp Partner

Webiplex is a proud member of the Sharp Partner Program providing both products and services to the Sharp dealer channel. Servicing the Sharp community for over four years, Webiplex continues to be an innovator in leveraging Sharp technology for document and business process management.

About Us

Webiplex was founded in 2006 to provide the most advanced rapid application development platform that is entirely Web based. Our core technology is document management and business process automation. Our platform delivers decades of process knowledge to our customers. Through the rapid application development technology of DocuPeak, we aim to serve our customers beyond just a single installed application. We aim to provide a solution whose ROI continues to grow the more it is used.
